

Cera Alba

Game designer: Christophe COAT

From 2 to 5 players

From 12 years old

15 min long per player

In Cera Alba, you play the role of a swarm of bees. Your work consists in foraging the most attractive plants, before they fade... You also have to develop your hive without forgetting to hatch your larvas to obtain new workers, either males, or even better: queens! But you are not the only swarm, and other bees gather the pollen of the same plants as you. Do not let these competitors take all the pollen, and do your best so that your hive becomes the most populated and the most productive!

Key points of the game:

- An expert game, simple to explain, with an omnipresent theme.
- The pieces (worker bees, male bees, queens) are the center of the game. The way each player chooses to use them is decisive for the win. Pieces can be played:
 - o To gather nectar (laying of workers)
 - o To gain plants (majority)
 - o To buy cards (currency of the game)

Prizes:

- **FLIP 2018:** Selected in the "Expert" category.
