

COSPLAY

A Game by Pascal & Delphine LOUVION

2 to 4 players

10 +

30 min

It's the annual meeting of Comics fans! Each player has 6 characters going there for the best costume contest of super heroes.

But the models have already begun to parade on the podium while your 6 companions are still looking for the right clothes! Players will have to change the clothes of their characters to make them look like the models on the podium as much as possible, and at the right time.

Each turn, the players choose a tile of a model among 3 (wig, bust, leggings) and they have then to make the most efficient moves between the characters and the clothes to give the right costume to the right person and gain a maximum of points!

Main Strengths :

- A simple gameplay mechanics that speaks to most people
- A creative theme working well with the mechanics
- The interest of the game is based on the choices to make (to pick the right tile) and on the moves to predict, using observation and optimization capacity. As a result, this is a game which needs a certain level of thinking.
